

## Návod na nastavenie WiFi klienta pre bezdrôtovú sieť INTRAK pod OS LINUX (GNOME)

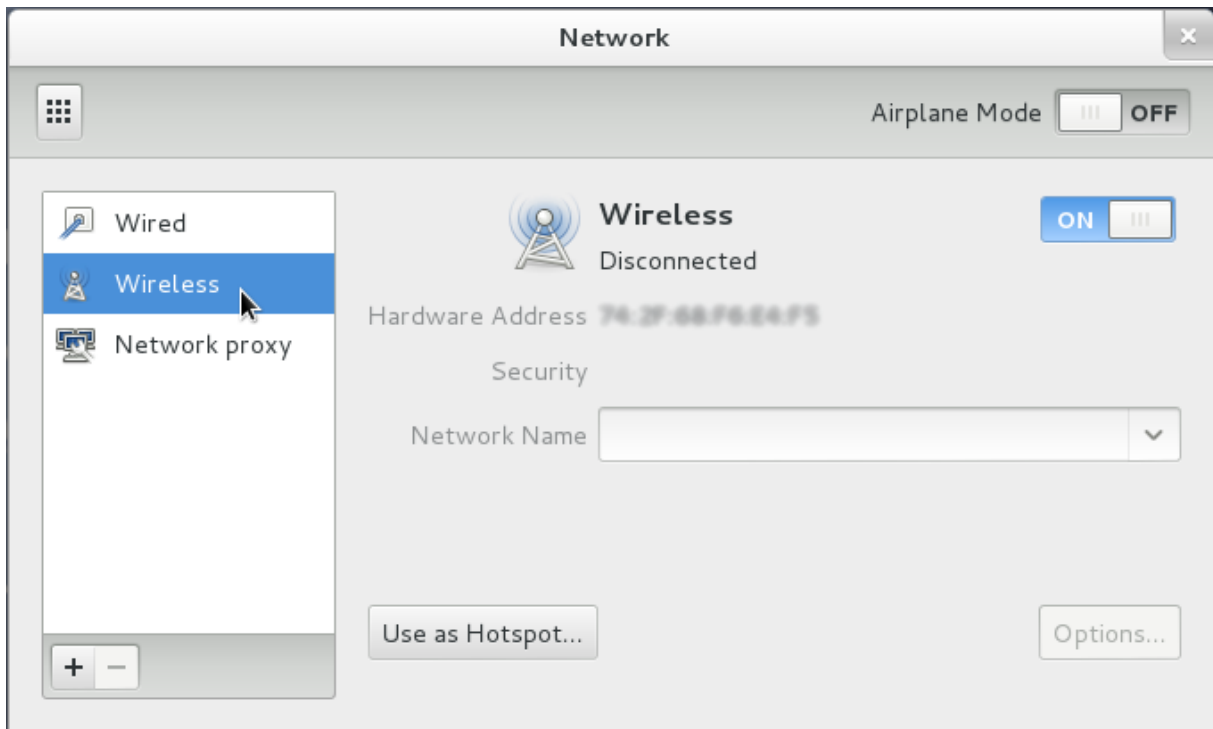

Skontrolujte si, či máte pod OS Linux nainštalovaný balík network-manager.  
Pre správne nastavenie vášho WiFi klienta pre prístup k bezdrôtovej sieti INTRAK pod OS Linux kliknite ľavým tlačidlom myši na ikonu pre bezdrôtové pripojenie na paneli úloh.

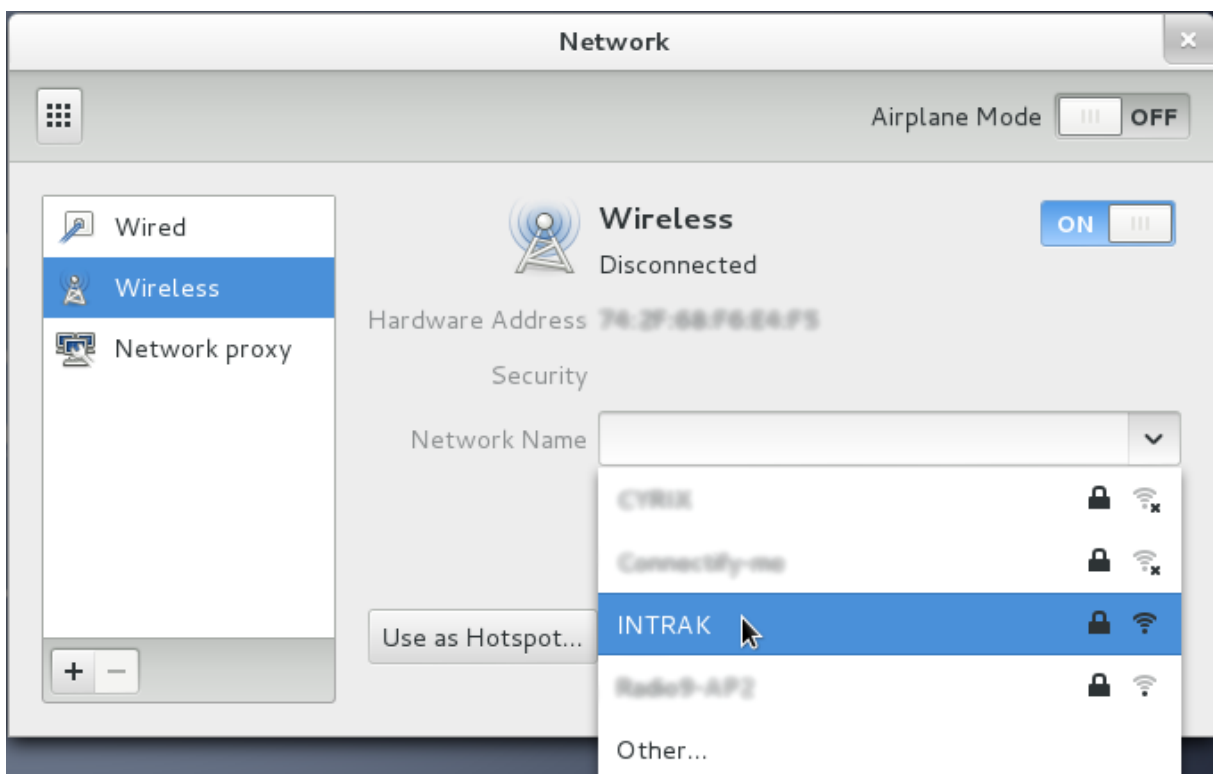

Kliknite na **Network Settings**.

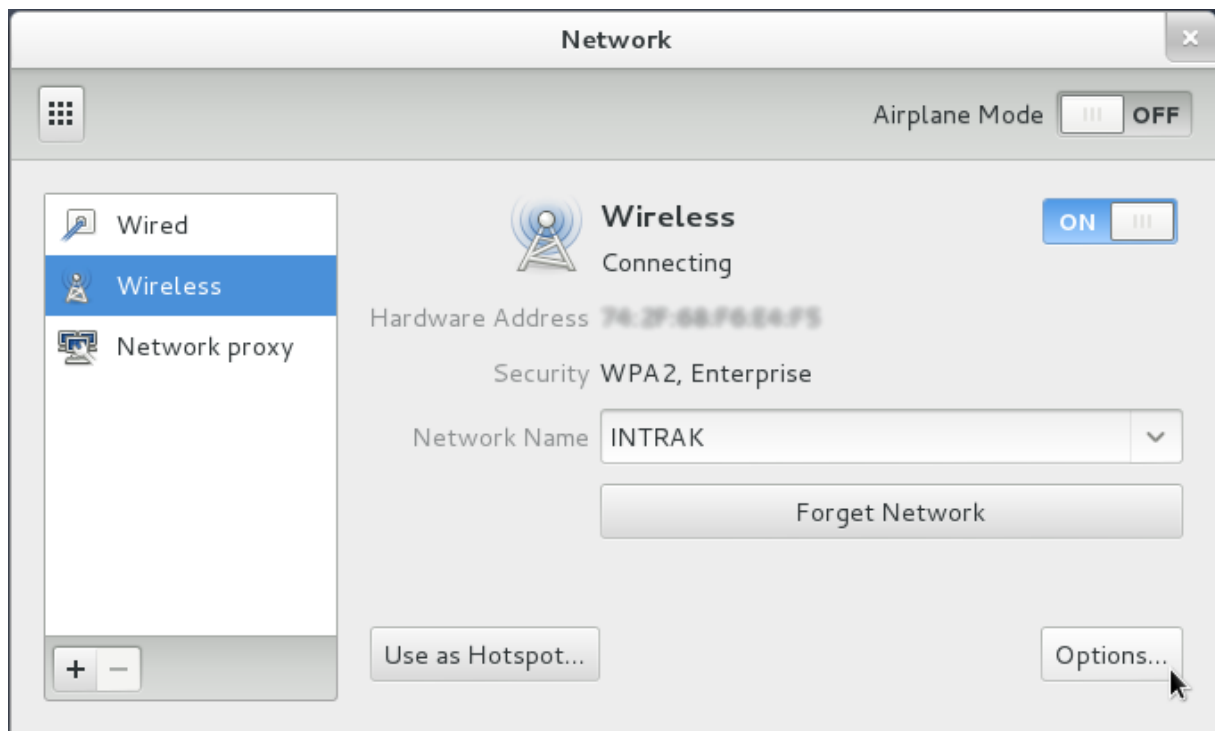

V okne **Network** vyberte záložku **Wireless**.

Z dostupných sietí vyberte sieť s názvom *INTRAK*.

...a kliknite na **Options**.

V otvorenom okne prejdite na záložku **Wireless Security**.

The image shows a window titled "Editing INTRAK" with several configuration fields and tabs. The "Wireless Security" tab is selected, and a mouse cursor is pointing at it. The fields are as follows:

- Connection name: INTRAK
- Connect automatically
- Tabs: Wireless, IPv4 Settings, IPv6 Settings, **Wireless Security**
- SSID: INTRAK
- Mode: Infrastructure
- BSSID: (empty)
- Device MAC address: 74:2F:68:76:EA:75 (wlan0)
- Cloned MAC address: (empty)
- MTU: automatic [ - + ] bytes
- Available to all users
- Buttons: Cancel, Save...

Vyplňte nasledujúce položky:

**Security:** *WPA/WPA2 Enterprise*

**Authentication:** *Protected EAP (PEAP)*

**Username:** je váš login do userpanelu v tvare *meno.priezvisko*

**Password:** je vaše WiFi heslo, ktoré ste si nastavili v userpaneli

The image shows a screenshot of a network configuration window titled "Editing INTRAK". The window has a tabbed interface with four tabs: "Wireless", "IPv4 Settings", "IPv6 Settings", and "Wireless Security". The "Wireless Security" tab is currently selected. Below the tabs, there are several configuration fields:

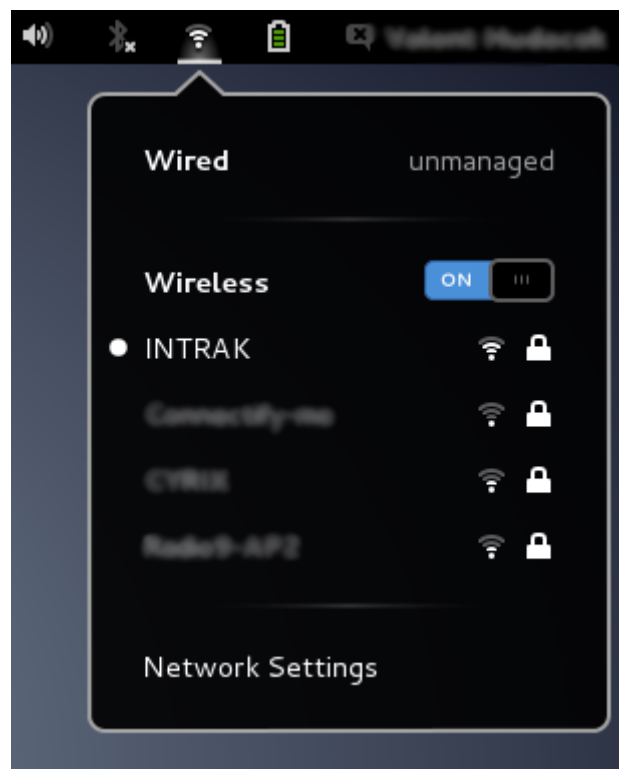

- Connection name:** A text field containing "INTRAK".
- Connect automatically:** A checked checkbox.
- Security:** A dropdown menu set to "WPA & WPA2 Enterprise".
- Authentication:** A dropdown menu set to "Protected EAP (PEAP)".
- Anonymous identity:** An empty text field.
- CA certificate:** A dropdown menu set to "(None)" with a folder icon to its right.
- PEAP version:** A dropdown menu set to "Automatic".
- Inner authentication:** A dropdown menu set to "MSCHAPv2".
- Username:** A text field containing "meno.priezvisko".
- Password:** A text field with ten dots representing a masked password.
- Ask for this password every time:** An unchecked checkbox.
- Show password:** An unchecked checkbox.

At the bottom of the window, there is a checked checkbox labeled "Available to all users" and two buttons: "Cancel" and "Save...".

Po uložení daných nastavení můžete být vyzváni na zadání CA certifikátu. Toto upozornění můžete ignorovat.

Ak ste vyplnili všetky položky správne, môžete sa pripojiť k sieti INTRAK.

Po pripojení k sieti INTRAK si OS Linux uloží všetky nastavenia tejto siete vrátane prihlasovacieho mena a hesla, preto ich už pri ďalšom prihlásení do systému a následnom pripojení sa k sieti INTRAK nemusíte zadávať.
